

CYNEX SERVICES

AGREEMENT CONTRACT

Remote Roblox Development Services

Effective Date: _____

DEVELOPER / SERVICE PROVIDER	CLIENT / PURCHASER
Legal or Business Name	Legal or Business Name
Email Address	Email Address
Roblox Username / Group	Roblox Username / Group
Country and State / Region	Country and State / Region

This Agreement records the terms under which the Developer will provide remote Roblox development services to the Client. Each Party confirms that the information stated above is accurate, that it has the authority and legal capacity to enter into this Agreement, and that both Parties intend to be legally bound. Any person who lacks legal capacity to contract must obtain the approval required by applicable law.

1. PROJECT DETAILS

Project / Experience	
Services and Deliverables	
Start and Target Completion	
Total Fee and Deposit	
Currency and Payment Method	
Main Communication Channel	
Governing Law / Arbitration Seat	

2. SERVICES AND COOPERATION

The Developer will perform the services and deliver the items stated in the Project Details using reasonable professional care. Work not stated there is outside the agreed scope. The Client will provide accurate instructions, lawful materials, necessary platform access, and timely decisions. Each Party will use the communication channel stated above for project approvals and notices.

Changes to features, deliverables, deadlines, or price must be approved in writing. Approval by email or an authenticated project message is sufficient. The Developer is not required to begin additional work until the revised price and schedule are accepted.

3. PAYMENT AND MILESTONES

The deposit is due before work begins. To the extent permitted by law, it is retained because it reserves the Developer's time and covers planning and initial work. The remaining fees are payable according to the milestone schedule below. Payment is received only when cleared and available to the Developer.

Stage	Deliverable or Event	Amount	Due
Deposit	Project reservation and commencement	_____	Before work
1	_____	_____	_____
2	_____	_____	_____
Final	Final delivery and license activation	_____	Before transfer

If any payment is more than five business days late, the Developer may pause work and withhold unpaid deliverables or access to Developer-controlled files until payment is received. Project dates will move by the period of delay plus reasonable restart time. The Developer will not use unauthorized access or delete property held in a Client-controlled account.

Robux payments must use a Roblox-approved in-platform method. Roblox alone determines whether Robux are pending, earned, transferable, redeemable, or eligible for DevEx, and neither Party guarantees any cash value or DevEx result.

4. REVIEW, REVISIONS, AND COMPLETION

The Client will review each milestone within five business days unless the Parties agree to another period. A request to correct work must identify a specific failure to meet the agreed scope. The Developer will correct qualifying issues within the original scope. New preferences, features, or changes are additional work.

A milestone is accepted when the Client approves it, publishes or commercially uses it, authorizes the next stage, or does not raise a specific scope-related issue within the review period. Final files will be delivered after all amounts due are paid.

5. OWNERSHIP AND PERMITTED USE

Until all Project fees are fully paid, the Developer retains all ownership and intellectual-property rights the Developer may hold in the source code, scripts, systems, models, interfaces, builds, design files, documentation, and other Project work. Before final payment, the Client may use submitted work only for private review and testing and may not publish, monetize, distribute, resell, or sublicense it.

After final payment, the Developer grants the Client an exclusive, perpetual, worldwide license to use, reproduce, modify, publish, operate, market, and monetize the paid Project-specific deliverables solely on the Roblox platform and in connection with the Client's Roblox experiences. The Client may allow its team and Roblox to use those deliverables only as needed to operate and publish the Project.

The Developer retains ownership of pre-existing or reusable tools, libraries, templates, generic systems, methods, and know-how. When any such material is included in a paid deliverable, the Client may use it only as part of that deliverable. Third-party, marketplace, and open-source materials remain subject to their own licenses. The Client retains ownership of Client-supplied materials and confirms that those materials may lawfully be used for the Project.

6. ROBLOX PLATFORM RULES

Both Parties will comply with the current Roblox Terms of Use, Creator Terms, Community Standards, Developer Exchange Terms, and other applicable platform rules. If Roblox changes a rule during the Project, the updated platform rule applies immediately and overrides a conflicting term of this Agreement only for the affected Roblox matter. The Parties will reasonably adjust the work or payment method to remain compliant.

Nothing in this Agreement limits rights granted directly to Roblox when content is uploaded or published, or limits Roblox moderation, suspension, removal, or platform changes. The Developer is not responsible for Roblox outages, policy enforcement, feature changes, account actions, or monetization decisions unless directly caused by the Developer’s intentional misconduct or material breach.

7. CONFIDENTIALITY AND PROJECT SECURITY

Each Party will protect the other Party's non-public source code, business information, project plans, credentials, revenue information, and other confidential material and will use it only for the Project. This duty does not apply to information that becomes public without breach, was already lawfully known, is independently developed, or must be disclosed by law.

The Parties will use role-based or approved collaboration access where available and will not request or share passwords or authentication codes. Access may be removed when it is no longer needed or when this Agreement permits suspension.

8. CANCELLATION

Either Party may end the Project by written notice. If the Client ends the Project without a material breach by the Developer, the Developer retains the deposit and the Client will pay for completed work, time already spent, approved additional work, and non-cancellable expenses up to the termination date. After those amounts are paid, the Developer will provide the completed paid work in its current condition.

If the Developer ends the Project without a material breach by the Client, the Developer will deliver completed paid work and return any prepaid amount that clearly relates to work not performed. A Party may end the Agreement for a material breach that is not corrected within seven business days after written notice. Fraud, intentional misuse of unpaid work, serious confidentiality violations, or a demand to violate law or Roblox rules may justify immediate termination.

9. WARRANTIES AND RESPONSIBILITY

The Developer will perform the services with reasonable professional care and will not knowingly include malicious code or unauthorized backdoors. During the review period, the Developer will correct reproducible scope-related defects. This does not cover changes made by the Client or others, misuse, third-party systems, security incidents outside the Developer’s control, or later Roblox platform changes.

The Developer does not guarantee Roblox approval, uninterrupted operation, exploit-proof security, player numbers, revenue, Robux value, discoverability, or DevEx eligibility. To the fullest extent permitted by law, neither Party is liable for indirect or consequential loss, and each Party’s total liability is limited to the Project fees paid or payable. This limit does not apply to fraud, intentional misconduct, unpaid fees, unauthorized intellectual-property use, confidentiality obligations, or any liability that applicable law does not permit the Parties to limit.

10. GOVERNING LAW AND ONLINE DISPUTE RESOLUTION

This Agreement is governed by the law and legal seat stated in the Project Details. If that line is left blank, it is governed by the law of the Developer's principal place of business stated on the first page. Mandatory rights that cannot legally be waived remain unaffected.

Before starting a formal claim, the Parties will first discuss the dispute in good faith through online communication for at least ten business days. If it is not resolved, the Parties will attempt confidential online mediation. Any remaining dispute will be finally resolved by one arbitrator through remote proceedings, with the legal seat in the governing jurisdiction. If the Parties cannot agree on an arbitrator within fifteen days, either Party may ask a recognized arbitration body or a court at the seat to appoint one.

A court may still be used for urgent temporary relief, enforcement or review of an arbitration award as permitted by law, a qualifying small claim, or a matter that cannot legally be arbitrated. Any permitted court proceeding will take place in the governing jurisdiction.

11. ELECTRONIC AGREEMENT AND EVIDENCE

The Parties consent to remote contracting and electronic records. A signature made through an electronic-signature service, a scanned signature, or a typed name sent from the signer's stated email or authenticated account with clear intent to agree will be treated as a signature to the fullest extent permitted by applicable law. The Parties may sign separate copies, which together form one Agreement.

The signed PDF, signature record, designated emails, authenticated project messages, invoices, payment records, repository history, delivery records, and Roblox transaction or collaboration records may be kept and used as evidence of identity, agreement, work, delivery, acceptance, payment, and notice. If local law requires an additional non-waivable formality, the Parties will complete it.

12. GENERAL TERMS

This Agreement and its written Project Details are the entire agreement for the Project. A change must be accepted by both Parties in writing. If one term is invalid, it will be adjusted or removed only as much as necessary, and the remaining terms will continue. A delay in enforcing a right is not a waiver. The Developer is an independent contractor, and neither Party may bind the other without written authority.

AGREEMENT AND SIGNATURES

By signing below, each Party confirms that it has read and accepted this Agreement and intends to be legally bound from the Effective Date.

DEVELOPER / SERVICE PROVIDER	CLIENT / PURCHASER
Legal Name	Legal Name
Email Address	Email Address
Electronic Signature / Typed Name	Electronic Signature / Typed Name
Date	Date

Each Party should retain a complete copy of the signed Agreement.
